IMMUNIZATION PROGRAM
2015 - 2016 FLU VACCINE ALLOCATIONS**

Frequently Asked Questions

How much flu vaccine can I order at one time?

The Nebraska Immunization Program receives the flu vaccine in allotments or rounds and we have now received most of our vaccine. You may look up your PIN on this table to find out how many doses of vaccine are available for your clinic to order. To find your clinic's allocation, tap the Ctrl key and F key at the same time. Then, type in your PIN and tap the enter key.

The "Balance Available to Order" columns reflect the amount of vaccine that your clinic may order at this time. In this example, PIN 01FQ01 may order up to 70 doses of Fluzone 0.25ml, 140 doses of Fluarix 0.5ml, 100 doses of Fluzone MDV, and 20 doses of FluMist. This table will be updated on a regular basis to reflect doses ordered and current vaccine allocations.

If your clinic has a large volume of vaccine available to order, do not order more vaccine than you will use in the next few weeks. This vaccine has been reserved for your clinic and will be available for your clinic to order on a future date. Flu orders may be placed on an as needed basis.

Can we borrow flu vaccine from our private stock until we receive vaccine from the Nebraska Immunization Program?

The Federal VFC Program does not allow borrowing of flu doses from either private or VFC stock due to the fact that the program may not be able to repay the same type of flu product or within the same season.
